Few industries rely on effective leadership for success more than the construction industry. With the overwhelming number of activities on any given job, it takes resourceful leadership to pull them all together. This presentation will be a summary level of basic 101 leadership techniques that apply to not only construction, but any team. The construction industry has many opportunities to lead teams. All of us need to be self-reflective on how we are doing and what can we do to get better. This Construction Advancement Foundation course workshop will enhance your individual skills and provide you with a handful of tools which will help you to become a more effective leader.

Learning Objectives

- Understanding your own strengths and weaknesses
- Recognizing the difference between management and leadership
- Best practices on how to become a better leader and communicator
- How to attract and recruit people to your team
